

# flexVDI 3.0 Administration Guide

This guide assumes that you have followed the [Getting Started](#) and [First steps with flexVDI Dashboard](#) guides. Once you have one host, one *Manager* instance and you are familiar with the *flexVDI Dashboard* interface, this guide will help you set up your cluster to add additional hosts and configure the shared storage.

- [Configuration](#)
- [Adding more hosts and shared storage](#)
- [Managing the flexVDI platform with flexVDI Dashboard 3.0](#)
- [VDI connections and the flexVDI Gateway](#)
- [Optimizing guest operating systems](#)
- [Backup and recovery strategies](#)
- [flexVDI Appliances](#)
- [Upgrading flexVDI Manager](#)
- [Updating flexVDI host packages](#)
- [Migrating a flexVDI platform to a different IP address](#)
